

# SWORDS from KODANSHA

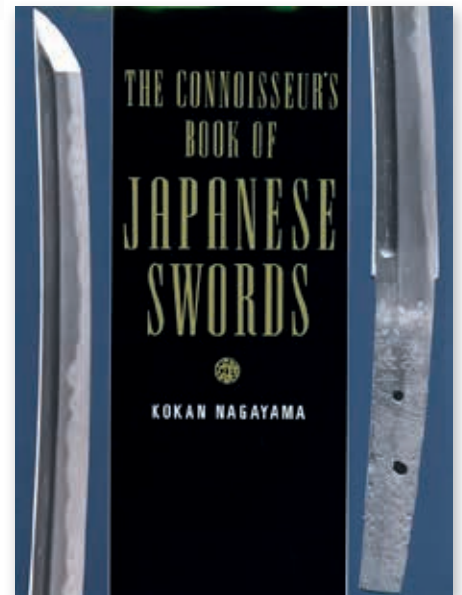

Two of the most highly regarded books ever published in English on the Japanese sword are now about to be **REPRINTED...**

**AVAILABLE  
from January 2017**

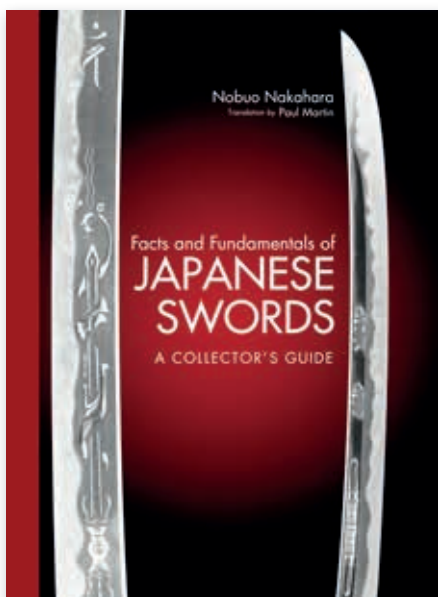

## THE CONNOISSEURS BOOK OF JAPANESE SWORDS

This comprehensive guide to the appreciation and appraisal of the blades of Japanese swords still offers an English translation of a definitive Japanese text on the subject. Taking the practical historical approach, it discusses each tradition, examining the features that distinguish specific schools and smith – the various kinds of *jihada*, *hamon*, *boshi* and *hataraki* favoured in different periods and regions. Each section closes with an easy reference chart summarizing the distinctive features of the work of various schools and smiths. There are chapters on terminology and description, and the care and appraisal of blades. Richly illustrated throughout with 550 of the author's own painstaking *oshigata* tracings / rubbings, *The Connoisseur's Book of Japanese Swords* remains the most comprehensive guide to appear in English.

Hardcover; 356 pages; 265 x 195 mm; 550+ hand-finished sword tracings **£65 HB**

isbn 978-1-56836-581-7

## FACTS AND FUNDAMENTALS OF JAPANESE SWORDS A COLLECTOR'S GUIDE by Nobuo Nakahara

This is an invaluable resource. Clear explanations and frank opinions enable readers to evaluate the condition of a blade, determine whether it is healthy or problematic, and easily recognise the fundamental elements that characterise works of enduring value.

### The book includes:

Summary of the historical development of blade shapes / Detailed explanations of the different parts of a blade / The effects of polishing / Instructions for sword maintenance and appreciation / Points to consider when buying a sword / Detailed explanations of blade grooves & engravings / In-depth discussion of *suriage* / Detailed overview of inscriptions...

**£35 HB** Hardcover; 192 pages; 260 x 190 mm; 160 b/w photos; 140 illustrations

isbn 978-1-56836-583-1

## MODERN JAPANESE SWORDS AND SWORDSMITHS From 1868 to the Present by Leon and Hiroko Kapp & Yoshindo Yoshihara

This book is highly authoritative: it describes the most recent 150-year period of sword history, and presents the work of key craftsmen active since the Meiji restoration. The authors illustrate developments in sword-making, its movement into artistic spheres, and the challenges swordsmiths have faced over the last century. It includes interviews with 22 modern smiths –holders of ancient lineages– who demonstrate how the blade's aesthetic power derives from a symmetry of the sword's basic elements: steel, shape, and texture. This harmony affords the blade a singular and delicate beauty. The book further includes comprehensive and intricate lineage charts of the major historical schools. The heightened aesthetic sense that characterises the contemporary sword and its production has ushered in what can be categorised as a distinctly new era of sword history, reflecting the dynamic changes which have taken place.

**£39 HB**    **isbn 978-1-56836-519-0**

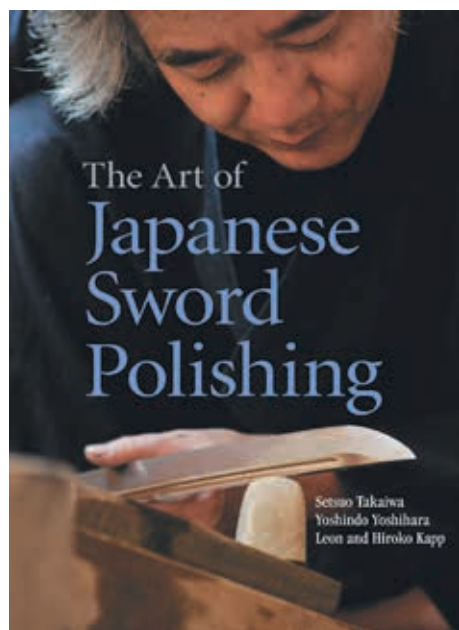

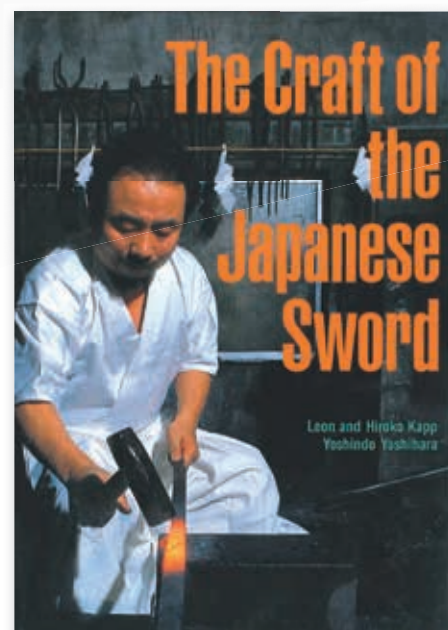

*Hardcover; 224 pages; 264 x 196 mm; 150 b/w photos; drawings; index*

## THE CRAFT OF THE JAPANESE SWORD by Leon and Hiroko Kapp & Yoshindo Yoshihara

Four of Japan's leading sword craftsmen each have a role creating a blade. Yoshihara, the swordsmith, takes raw steel made in a traditional charcoal-fueled smelter and folds and forges, slowly shaping it into a sword with hardened edge. Fujishiro then sharpens and polishes the sword to reveal the colour and texture of the steel. Miyajima makes the copper-and-gold *habaki* collar to fit between blade and scabbard. Finally, Takayama carves the hilt and the scabbard out of a single piece of wood. Black-and-white photographs show every stage, while information on history, metallurgy, and modern-day appraisal is presented in an extensive introduction. First published in 1987, this book still represents the finest and most thorough introduction to this idiosyncratic Japanese art form ever published. While many fine books on sword appreciation exist, these deal primarily with older blades or problems of appraisal. *The Craft of the Japanese Sword* is the first book in English devoted entirely to contemporary sword manufacture, and will thus be of enormous value to metal artists everywhere, as well as to collectors and students of weaponry.

**isbn 978-1-56836-431-5**    **£39 HB**

*Hardcover; 168 pages; 264 x 190 mm; 8 colour pages; 120 b/w photos; index*

## THE ART OF JAPANESE SWORD POLISHING by Setsuo Takaiwa, Yoshindo Yoshihara, Leon & Hiroko Kapp

To understand Japanese sword polishing is to understand the Japanese sword. Down through the years, the great sword connoisseurs in Japan have been sword polishers. A swordsmith can spend a large amount of time forging a classic sword, but refining and bringing out its final shape, color, and texture so that all the details of the steel and hamon (the temper line) are clearly visible is the responsibility of another craftsman—the sword polisher.

This is the first book in English to examine in detail a skill whose apprenticeship is 10 years. It illustrates the methods, materials, and tools used for this process. But the book's true aim is to bring to readers an appreciation of the beauty of a well-crafted Japanese sword. As readers learn both how the sword polisher enhances the beauty of a blade and how he handles the problems of coaxing out its finest qualities through his polishing techniques, they will come to a higher understanding of the fine art of making a Japanese sword.
